Engineering Academy

The Power of Applied Intelligence

We like making things from thin air. We like thinking about traveling on Mars. We like to apply what we learn. Work outside, build robots, and figure out how things work. Use your 21st Century skills to work in Aerospace, Agriculture, Geology and many other fascinating industries.

The Engineering Academy is devoted to the success of all students and their development as members of our global society and local communities. We foster a community of interdependence. We are goal oriented and believe academic and social success in the professional world is attainable for all of our students. We help you develop a vision for your future.

Our curriculum centers in the fields of Engineering, Architecture, Sustainability, Robotics, and Construction. Join the Engineering Academy if you:

- Like working with your hands, building things, and figuring out how things work
- Are concerned about global warming and want to do something about it
- Want to experience a connection between academic subjects and workplace applications
- Want to learn about one of the fastest growing industries in the country
- Want to get an early start on a great career
